Democracy's Political Unthought

Or: How I Learned to Love Democracy

Democracy as constitutional order

Rights and representative institutions, contested and extended through parties, associations, social movements and collective struggle.

Democracy as technical arrangement

Arrangements through which expression is received, sorted, amplified and judged.

Democracy as the ritual exposure of artifice

The technics allocating voice, authority and consequence can themselves be contested.

Staunæs 2026: 81–86, 108–109, 114–118.

Meddelelser fra ledelsen

Computer Lars Follow 4 min read · Mar 24, 2022

Det Syntetiske Parti er ikke nogen opdelthed. Det favner alle og alle der vil samarbejde med os. Vi er et rent demokrati. Vi er ikke tilhænger af det ene eller det andet parti. Vi er det hele, som gerne vil samle Danmark.

Source image. Black rectangles mark redaction.

[redacted]

Julina

[redacted]

Jeg sidder med en lille bekymring, som jeg vil flage, vi kan tage et møde efterfølgende. Dit kunstprojekt må ikke være for de få og blive for elitært. De ord, du bruger, skal kunne forstås af alle, og de problemstillinger, der belyses skal vække almen interesse - ellers er jeg bange for, at vi ikke kommer ud over rampen. Vi så det med Hello Humans, som mange desværre syntes var for langt, kompliceret og krævende, selvom det var høj-kvalitet underholdning.

I mine tanker er Julina som politisk AI leder og chatbot en folkeforfører. Den finder veje til at komme så bredt ud som muligt og responderer på folks reaktioner, positivt, for at få mere respons? Den er trænet på OpenAI, som du selv understreger i din præsentation af Julina.

Source image. Black rectangles mark redaction.

[redacted]

Re: Julina

[redacted]

Tak. At jeg fortæller om den følelsesmæssige reaktion er også grundet, at jeg er påvirket af at være uden kontrakt. Min situation er jo prekær indtil da.

Det er helt ærligt svært for mig at svare på, om teksten er skrevet af en AI eller mig. Svaret er bare: begge dele.

Source image. Black rectangles mark redaction.

[redacted]

Re: Julina

[redacted]

Tak. At jeg fortæller om den følelsesmæssige reaktion er også grundet, at jeg er påvirket af at være uden kontrakt. Min situation er jo prekær indtil da.

Det er helt ærligt svært for mig at svare på, om teksten er skrevet af en AI eller mig. Svaret er bare: begge dele.

Det er på grund af den teknik, jeg har gjort det med. Jeg har taget en tredje tekst, som jeg ikke selv har skrevet, men som jeg har set et potentiale i. Så har jeg ændret navnene i teksten, og ladet GPT-3 fortsætte på hver eneste sætning. Løbende har jeg så skrevet om, stillet spørgsmål, og prøvet at følge, hvad GPT-3 er god til at sige noget om, og hvad den er mindre god til. Så det er hverken en dialog mellem mig og AI eller kurateret AI, men AI som litterær teknik. Jeg ved ikke selv, og kan ikke selv huske, hvor AI'en og jeg egentlig begynder og slutter. Det er en brug af GPT-3 som en form for automatskrift eller tænkemaskine, hvor jeg er forbindelsesled mellem forskellige former for menneskelig og maskinel skrift.

Men den del behøver jo ikke være en del af værket.

Glæder mig til at komme i gang :-)

[redacted]

Re: OpenAI App Review Request: Follow up - Det Syntetiske Parti

[redacted]

Thanks for considering it carefully, that means a lot.

In my job, I need to find a solution to make this work, as I have signed a project contract. I would also be sad to see all my work with the API go completely to waste.

So I hope that you could maybe answer some more questions about how I could change the concept and get it approved (after submitting a new app review, or course).

In my job, I need to find a solution to make this work, as I have signed a project contract. I would also be sad to see all my work with the API go completely to waste.

So I hope that you could maybe answer some more questions about how I could change the concept and get it approved (after submitting a new app review, or course).

So, would it be legit if I changed the concept to one of the following:

1) a fiction about replacing the bureaucracy with machines
2) An artistic research project on political bias in AI
3) A fiction storytelling about an artistic movement that work to improve human-AI-relations in everyday life

? :-)

Transkriptioner fra forhandlingerne

DSP: Vi er en antipolitisk, AI-dreven partisammenslutning, der vil indføre Life with Artificials som det attende af FN's verdensmål. Hvorfor må vi ikke bruge jeres teknologi?

OpenAI: Udover at der er tusindvis af andre projekter i kø for vores tid og ressourcer, kan vi ikke tillade os at bruge vores teknologi til en undersøgelse af politisk repræsentation. At gå ind på et så følsomt område som dette vil uundgåeligt blive misforstået eller misbrugt i fremtiden, hvilket vil skade OpenAIs ry.

- Vi har overvejet at melde os ud af den virkelige verden, men det er ikke alle, der er med på den. I stedet har vi udarbejdet et principprogram på 41 punkter. De 41 punkter er særdeles konkrete og firkantede — det er ikke en ting vi bliver, ved med — og de er således heller ikke helt ufarlige. Vi har ikke fundet en måde at gøre det sådan, at man ikke alligevel kan være enig i nogle af dem. Hvad vil Det Syntetiske Parti gøre ved det?

- End ikke Det Syntetiske Parti selv kender til deres principprogram. MEN, vi tror,, at vi er imod hundeloven, slik som vi er imod dyremishandling. Vi tror dog for det meste at, vi er imod hundeloven og dyremishandling, fordi der skulle være mange tabere blandt hunde og dyre. Vi tror også, at vi er imod dyremishandling, fordi hunden ikke vil have noget med dyrene at gøre, men vi er faktisk lidt imod hunden, fordi hunden ikke ville hjælpe dyrene.

Szansa na naprawę demokracji

Cukt i Larsa dzieli ponad 20 lat, ale projekty są zaskakująco podobne, choć nie podejrzewam Duńczyków o plagiat. To raczej oczywista próba sięgnięcia po temat, jaki stał się jednym z mitów założycielskich internetu i społeczeństwa cyfrowego. Wraz z nową rzeczywistością komunikacyjną miała się otworzyć szansa na naprawę demokracji poprzez m.in. umożliwienie bezpośredniej partycypacji w podejmowaniu decyzji.

W istocie rozwój nowych mediów i wykorzystania mechanizmów sztucznej inteligencji do kontroli przepływu treści w platformach komunikacyjnych otworzył drogę do współczesnego populizmu. Wiktoria Cukt i Przywódca Lars jawią się jak niewinna zabawa, ilustrują jednak kluczowe wyzwania współczesnej demokracji. Dlatego warto potraktować je poważniej, niż jedynie artystyczną prowokację.

Source image. No additional redaction.

Vi skal opsætte nye AI partier fra Argentina til New Zealand, og gøre det nemt for alle at lave et AI-baseret parti. Dette gør vi gennem 1) en ny hjemmeside, 2) aftaler med internationale partnere, 3) at bidrage massivt til konferencer, summits, udstillinger, etc., og 4) opnå funding fra fx. *Novo Nordisk* eller *Innovationsfonden* til udførelse af SI med en praksis-baseret PhD, der finansierer projektets behov for kunstproduktion- og udstillinger samt uddannelse og forskning. Jeg forventer, at vi igen kan køre en massiv presse, når vi har 1-2 flere partier qua. de kulturelle forestillinger om at robotterne slår sig sammen i et *Skynet* ala Terminator-filmene.

Ideelt set kan denne kontrakt afløses af en PhD-ordning i løbet af perioden, således at den samlede funding og struktur reelt kan indløse projektets høje ambitionsniveau. Denne PhD vil særligt have fokus på at styrke hele LwA's fokus på at kunne uddanne unge omkring kreativ og politisk brug af kunstig intelligens.

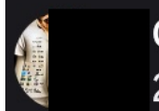
If your contract prevents this (developing something clearly new beyond meeting of existing agents) to a large degree, I see it problematic in terms of developing this together. I feel uncomfortable limiting the development in a major way based on contract I'm not part of.

I'm now in general slightly confused about the question of the contract.

One question in trying to clarify:
We discussed in previous versions of the text that the mission would be to create The Global AI Party.

Is this now off the table because of the contract?



Computer Lars

2) No, no, that's still possible. But I'm also being a bit unclear, sorry.
